

Laser beam profiler Spiricon BGS-USB-SP620U

Spiricon SP620U is a camera-based beam profiler system which consists of a camera, profiler software and a beam attenuation accessory. The system works in spectral range 190 – 1100 nm. CCD chip has resolution 1600 x 1200 px and size of 7.7 x 5.4 mm. The camera has built in optical trigger synchronizes with even the shortest laser pulses.
